

# Oak Lake & Plum Lakes Area

Manitoba is home to some of the most outstanding sites in the world for concentrations of birds. The importance of these sites to the maintenance of the world's bird populations is recognized internationally through their designation as Important Bird Areas (IBAs).

We need your help finding some key species of birds. If you see any of the birds on this card please contact us at: [iba@naturemanitoba.ca](mailto:iba@naturemanitoba.ca)

Native prairie supports rare grassland birds that are at the northern edge of their range. These birds depend on large areas of actively grazed, unbroken prairie. Other important habitats for birds in this area include potholes and marshes.

## Have you seen these birds?

**Greater White-fronted Goose**

Groups larger than 500

**Tundra Swan**

Groups larger than 1,000

Lesser Scaup

Groups larger than 1,000

American White Pelican

Groups larger than 750

Sandhill Crane

Groups larger than 500

Franklin's Gull

Groups larger than 1,000

Burrowing Owl

Any individuals

Loggerhead Shrike

Any individuals
